AI automation at NaSCon

FAST University, Islamabad

16–17 October 2026

Build and deploy

2 students per team

Deploy your work on Alternate Clouds.

Student guide

All event times are Pakistan Standard Time (PKT, UTC+5).

AGENTIKA 2.0 | Alternate Futures | grayhat DEVELOPERS (PVT.) LTD.

Welcome to Agentika

- NaSCon is an annual university event at FAST University.
- Agentika 2.0: build AI automation in teams of two.
- Deploy your project on Alternate Clouds.

Organizing team

Muhammad Saad	CEO, Grayhat
Muhammad Taha	Event Organizing Lead
Abdullah	Communication Lead

Getting ready

Before you arrive

- Bring your laptop, charger and registration confirmation.
- Register with your Discord ID, LinkedIn and WhatsApp number.
- Join the Alternate Futures Discord server through the event invite.
- Set your display name in the Alternate Futures Discord server to: Your First Name [Participant/Team Name].
- Example: Hassaan [Participant/Alpha].
- Use the event channels for discussions and sponsor interactions.

Competition format

- Work in a team of 2.
- Develop your own AI automation idea around the assigned theme.
- Deploy your project on Alternate Clouds.
- Check deployment compatibility with technical support early.

Workshop and community

- Workshop: AI agents, Alternate Clouds and effective AI use.
- We will use the Alternate Futures Discord server for discussions, announcements and support.
- Share progress in #hackathon-build-in-public.
- Workshop recordings will be shared on YouTube.

Your first checkpoint

- Define the problem your project solves.
- Choose a manageable version you can build and demonstrate.
- Test a small deployment before adding more features.

Event schedule

16–17 October 2026 / All times in PKT (UTC+5)

16 October / Day 1

Time	Activity
9:00 AM	Participant arrival
9:30 AM	Opening assembly and seating
10:00–10:30 AM	Kickoff and introduction
10:30–11:30 AM	Technical workshops
11:30 AM–12:00 PM	Theme, problems, rules and rubric
12:00–12:30 PM	Q&A
12:30–1:00 PM	Icebreakers, games and quizzes

17 October / Day 2

Time	Activity
12:45 PM	Project submission deadline
1:00–3:30 PM	Grayhat internal shortlisting
3:30 PM	Top 10 teams announced
4:00–5:00 PM	Finalist presentations
5:00–6:00 PM	Closing ceremony and prizes

Follow Discord announcements for any schedule updates.

Alternate Clouds: first steps

Quick deployment exercise

Before you deploy

- Sign in at clouds.alternatefutures.ai.
- Confirm event credits or trial access with the organizers.

01 Create an agent

- Open a project, select Add Service, then Alternate Agent.
- Choose a name, describe its task, select a model and create it.

02 Deploy

- Select Deploy and wait for the deployment status.
- If it fails, capture the error and ask technical support.

03 Test the agent

- Open its web chat using the room link and passphrase.
- Mention the agent by name to test it with a clear question.

Check your project's requirements

- Check runtime, storage, external API and credit requirements.
- Test a small deployment first.
- Check AI-generated code and outputs. Keep credentials private.

Official agent deployment tutorial

Documentation and platform help

AGENTIKA 2.0 | Alternate Futures | grayhat DEVELOPERS (PVT.) LTD.

Deployment resources

Before you start

- Deploy your competition project on Alternate Clouds.
- Check your project's stack with the technical support team.
- Watch the deployment demo linked below.

Deployment demo

Open demo folder on Google Drive

Scan to open

Using the demo

- Open the folder or scan the QR code above.
- Follow the demo while setting up your project.
- Test your deployment and ask technical support if you get stuck.

Alternate Futures documentation

Your LinkedIn post

One teammate publishes in English. The other reshares the post.

Use this structure in your own words

- Project name and problem solved.
- What you built and your contribution.
- How you used Alternate Clouds and what you learned.
- Screenshot or demo, project link and hashtags.

Write it yourselves. Grammar-only tools are allowed.

Hashtags to copy

LinkedIn

#AgentikaAIHackathon #AIAutomation
#AIHackathon #BuildInPublic

X (optional)

#AgentikaAIHackathon #AIAutomation

Mandatory rules

Disqualification conditions

01 Write your LinkedIn post yourself

AI-written posts lead to disqualification.
Grammar-only tools are allowed. Write the content yourselves.

02 Deploy on Alternate Clouds

A project not deployed on Alternate Clouds will be disqualified.
Local-only demos or hosting elsewhere do not qualify.

03 Communicate in English

If a moderator observes repeated Urdu use, the participant
or their team will be disqualified from the event.

Submission checklist

- One teammate posts on LinkedIn; the other reshares.
- Keep your post, reshare and deployment links ready.
- Report deployment issues to technical support.
- Submit one PDF per team by 12:45 PM PKT on 17 October. See pages 9–11.

Submission instructions

One PDF per team / Include sections 1–5 from pages 9–11

17 October, 12:45 PM PKT

- Late submissions are not accepted.
- One teammate submits the PDF on behalf of the team.
- You may revise your submission until the deadline.
- Check the Alternate Futures Discord announcement for where to send your PDF.

1. Team details

- Team name.
- Both members' full names, emails and registered Discord usernames.
- One WhatsApp number for the team contact.

2. About your project

- Project name and a one-line pitch.
- The problem and who it is for, in 2–3 lines.
- Where the human comes in: which step needs human judgment or approval, and why. Theme: Human + AI: Better Together.
- What you built with: n8n, custom code or both, plus the AI models, APIs and MCP you used.

Links and proof

Include these in the same submission PDF

3. Required links

- Live Alternate Clouds deployment link. Keep it running until the closing ceremony.
- GitHub repository link, public or accessible to judges, or your exported n8n workflow (JSON) via an accessible download link.
- A 2–3 minute demo video: unlisted YouTube, or Google Drive set to anyone with the link.
- Your original LinkedIn post and your teammate's reshare link.
- X / Twitter post link: optional.

4. Proof screenshots

- Discord: show both teammates in the Alternate Futures Discord server.
- Alternate Clouds: show your project's service and deployment status in the dashboard, proving it is hosted on Alternate Clouds.

Access for judges

- If the project needs a login, include a dedicated test username and password in the submission PDF.
- Use a demo account only. Never include personal passwords, API keys or production credentials.
- Check that judges can open every link before submitting.

Confirmations and judging

5. Confirm before submitting

- [ ] We wrote our LinkedIn post ourselves. Only grammar-only tools were used.
- [ ] Our project is deployed on Alternate Clouds.
- [ ] No API keys or personal or production passwords appear in our repository, video or screenshots.
- [ ] We have credited third-party code and templates.
- [ ] We will not change our code or deployment after 12:45 PM PKT on 17 October.

Judging process

- Grayhat judges shortlist the top 10 teams from 1:00–3:30 PM. Include your demo video so judges can review your project.
- The final panel includes Alternate Futures and Grayhat.
- Each finalist has 6 minutes to demonstrate the deployed project.

Scoring

- Six weighted criteria, for a total of 100 points.
- See the complete judging rubric on page 13.

Prizes and support

WINNING TEAM

PKR 50,000

RUNNER-UP TEAM

PKR 30,000

Total prize pool: PKR 80,000

Participant experience

- Event kit: T-shirts, participant cards and stickers, subject to allocation.
- Daily prizes: Coolest Drip, Best Selfie Trophy and Couplet Builder.

Conduct and help

- Treat others respectfully and take care of lab equipment.
- Credit third-party work and share honest platform feedback.
- For technical help, share the error and steps to reproduce it.
- Never post passwords or access tokens.

Contacts

- Abdullah, Communication Lead, handles event questions.
- Ask the on-site technical support team for deployment help.
- Use the Alternate Futures Discord server for event announcements and support.

AGENTIKA 2.0 | Alternate Futures | grayhat DEVELOPERS (PVT.) LTD.

Final judging rubric

17 October 2026 / Score each finalist out of 100

Each team has 6 minutes to demo its deployed project.

25 — **Technical execution & reliability**

Does the workflow function end to end? Are integrations reliable, and are errors and edge cases handled?

20 — **Usefulness & real-world impact**

Does the solution address a genuine problem and provide practical value?

15 — **Theme alignment**

How directly does the project address Human + AI: Better Together? Is the theme central to the solution rather than added as an afterthought?

15 — **Creativity & uniqueness**

Is the idea inventive and differentiated from generic AI wrappers or existing solutions?

15 — **Automation depth & integration**

How effectively are AI agents, APIs, automation tools and MCP used, where appropriate, to create a coherent workflow?

10 — **User experience & presentation**

Is the solution easy to use, and can the team clearly demonstrate its value?

100 TOTAL POINTS

Suggested scoring guide

Excellent 90–100% / Good 70–89% / Fair 40–69% / Weak below 40%
